Сепараторы для пищевых отходов серии YG/YGL YG-1, YG-3, YG-10, YGL-3 Техническое описание

The Pressurised Waste Food Separator and Compactor uses hydraulics to compress food waste under high pressure and turns it into a useful resource. This promotes the recycling and reuse of resources. This machine is a great tool for recycling unused and old food preventing huge amounts of waste.

The machine is designed to de-package food stuffs, unpacking and compressing the food waste into a paste which can be re-used. The packaging is also compressed and separated and disposed of or recycled. The compressed food paste can be used in a wide range of industries as animal feed, compost, in energy generation, methane gasification, and as fodder or fertilisation, to name a few. It prevents food wastage and can help companies who end up with a large amount of food waste to re-use this and re-sell it so they don't lose money on unused food. They are also great for manufacturers who use the compressed food paste to create products as it will allow them to create as much as they need themselves, whenever they want it.

Food waste processed by high-pressure compression technology becomes a paste-like effective resource, and fixed objects such as trays, food containers, disposable chopsticks, toothpicks, bones, shells, etc. are separated as foreign matter, creating an ideal sorting machine.

Food waste Pressure Separator YG/YGL Series has the following functions and features.

- 1. Food waste can be put in the machine while it is still wrapped.
- 2. High-pressure compression automatically separates waste into useful resources and foreign matter.
- 3. Effective resources are in paste form, making them suitable for transportation.
- 4. Paste-like effective resources are advantageous for recycling because decomposition and fermentation are fast.
- 5. Contaminants are dehydrated, reduced in volume, and discharged.

Methane gasification, composting, feed conversion, carbonization, drying, purification, volume reduction and elimination applications include wholesale markets, food processing factories, food centers, supermarkets, department stores, restaurants, hotels, and hospitals where a large amount of garbage is produced. Highly effective for disposal of raw garbage and expired food waste discharged from kitchen facilities such as student and employee cafeterias.

Model no.		YG-1	YG-3	YG-10	YGL-3
Ability to handle (L h)		130	300	1000	300
Power supply		200V / 220V (50 / 60Hz) 、 3-phase			
Motor	For hydraulic pump	1.5kW×4P	3.7kW×4P	7.5kW×4P	2.2kW×4P
	For screw conveyor	100W×4P	100W×4P	400W×4P	--
		800	1000	2500	650
